Research Interests

I am broadly interested in theoretical computer science. My current research looks at the interplay between computational complexity, cryptography, and learning theory.

Education

- 2022-present **Boston University**
PhD in Computer Science
Advisor: Mark Bun.
Expected graduation: May 2028
- 2018-2022 **University of Rochester**
BS in Computer Science with Highest Honors in Research and Highest Distinction
BS in Mathematics with Honors and Highest Distinction
Cumulative GPA: 3.97 - *magna cum laude*
Elected to the Phi Beta Kappa honor society.

Honors

- 2025 **2025 IBM PhD Fellowship Award**
- 2022 **Chair's Fellowship**, *Boston University Department of Computer Science*
- 2022 **Outstanding Senior Award**, *UR Department of Computer Science*
The department's highest honor at graduation, awarded to a graduate "who has made outstanding contributions to the department and its undergraduate program in academics, research, and student leadership, and who has gained the respect and appreciation of the department community."
- 2022 **Award for Excellence in Undergraduate Research**, *UR Department of Computer Science*
Awarded to two members of the graduating class "who have worked on significant research, received awards, presented at conferences, and/or been published as a result of their work."
- 2022 **Honorable Mention**, *CRA Outstanding Undergraduate Researcher Awards*
- 2021 **Young Researchers' Award**, *Computational Geometry: Theory & Applications*
Annual journal award for authors under 35. Awarded for *Distinct distances with ℓ_p metrics*.

Conference Articles

- [1] Mark Bun, Mandar Juvekar, and Samuel King. QMA lower bounds for batch verification via approximate degree. In *Proceedings of the 30th International Conference on Randomization and Computation (RANDOM)*, 2026.

Talks

- 2026 Circuit Lower Bounds, Hardness of Learning, and More from Cryptography and Proof Complexity. *Boston University Theory Seminar*, September 2026.
- 2026 QMA Lower Bounds for Batch Verification via Approximate Degree. *30th International Conference on Randomization and Computation (RANDOM)*, August 2026.
- 2022 Gaps, ambiguity, and establishing complexity-class containments via iterative constant-setting. *47th International Symposium on Mathematical Foundations of Computer Science (MFCS)*, August 2022.
- 2020 Monotonic inference for underspecified episodic logic. *1st Workshop on Natural Logic Meets Machine Learning (NALOMA)*, July 2020.

Research-Related Experiences

- Spring 2026 **National Institute of Informatics, Tokyo International Internship Program**
with Shuichi Hirahara. Topic: Metacomplexity and cryptography.
- Summer 2023 **Summer School in Probabilistic Proof Systems**
Organized by Alessandro Chiesa and SL Math in Zürich, Switzerland.
- Summer 2021 **Summer Undergraduate Research Fellow in Mathematics**
California Institute of Technology, Advisor: Nets Katz
- Summer 2020 **Polymath REU**
Remote, Advisor: Adam Sheffer
Paper: [11]

Teaching Experience

- 2023-2025 **Teaching Fellow**, Boston University
Courses: Graduate Complexity Theory (2x), Theory of Computation, Responsible AI.
- Summer 2023 **Teaching Assistant**, *New Horizons in Theoretical Computer Science*
Led small-group problem-solving sessions, organized course logistics, and ran social activities at a week-long online summer school aimed at exposing undergraduate students to research topics in theoretical computer science.
- Summer 2022 **Instructor**, TRIPODS REU 2022, University of Rochester
Taught a four-week reading course on computational learning theory and mentored undergraduate students on projects in machine learning and natural language processing.
- 2019-2022 **Undergraduate Teaching Assistant**, University of Rochester
Undergraduate teaching assistant for: Design & Analysis of Efficient Algorithms (twice), Computer Models & Limitations, Computer Organization (twice), Calculus I and II.
- Summer 2020 **Instructor**, TRIPODS REU 2020, University of Rochester
Helped organize the TRIPODS REU 2020 on higher-dimensional probability with applications to data science. Wrote Python worksheets for the program and facilitated programming sessions.
- Summer 2020 **Summer HSSP**, Educational Studies Program, MIT
Designed and co-taught two 6-week courses for high-school students: one on mathematics and physics concepts in audio and music, and one on the axiomatic construction of numbers.
- 2019-2020 **Peer Tutor**, Center for Excellence in Teaching and Learning, University of Rochester
Tutored various computer science and mathematics courses.

Service

- 2025-2026 **Reviewer** for peer-reviewed conferences: RANDOM 2025, FOCS 2026.
- 2022, 2023 **Co-organizer**, TRIPODS REU, University of Rochester.
Principal organizer: Alex Iosevich.
- 2019-2022 **President**, University of Rochester Splash
President (since 2020), and formerly Vice-President (2019), of UR Splash, a student organization at the University of Rochester focused on educational outreach to local high-school students.
- 2018, 2019 **Mentor**, Google Summer of Code
Mentored undergraduate students on open-source coding projects for the Google Summer of Code program (2018 and 2019) with the Terasology, an open-source game development organization.
